The Gallagher Story: Joe the Horse
(by Sir William, the son of the founder and the current owner of Gallagher)

GALLAGHER
80 YEARS

JOE, THE GALLAGHER FAMILY'S HORSE. THE STORY OF THE EARLY DAYS STARTED WITH HIM. HE USED THE FAMILY CAR AS A SCRATCHING POST AND THAT WAS NOT QUITE THE IDEA. BILL GALLAGHER SENIOR DEVELOPED A SOLUTION FOR THE PROBLEM AND THE VERY FIRST ENERGIZER IN THE WORLD WAS BORN. ADD THE GALLAGHER PHILOSOPHY AND YOU HAVE THE REASON FOR THE SUBSEQUENT SUCCESSES.

Client first
Joe's story symbolises the mission that is inherent to Gallagher: To develop the best products to help you - anywhere in the world - to solve your problems and improve business operations. That is the underlying principle of everything we do.

Innovation
To be the best. We are and we do everything in our power to stay the best. We are constantly looking for opportunities to strengthen our lead. We achieve that by continuously improving ourselves and our products. Always driven by input from our customers.

Top quality
Whether it is about customised service or innovative products that meet your needs - our priority is always the best quality and the best service.

And what about the next 80 years?
The Gallagher philosophy is solid as a rock. It was back in the day, it is now, and it will be in the future. It's in our genes, it's who we are. For the future you can expect what you could always expect from us – we are ready to serve with the best products and service for you!

'BRILLIANT SIMPLICITY'

80 YEARS OF GALLAGHER IN IMAGES

FIRST ENERGIZER IN THE WORLD
Bill Gallagher makes the very first energizer to make sure his horse Joe no longer scratches his car…

1938

PRODUCTION START-UP OF ELECTRIC FENCING
Production starts from a workshop in Hamilton, New Zealand.

1949

1969

FIRST MAINS ENERGIZER
It becomes possible to put more current on fencing.

1970

START OF SALES IN EUROPE
Farmers in Europe are flabbergasted by the power of Gallagher energizers.

1978

INTRODUCTION OF SMARTPOWER - FIRST INTELLIGENT ENERGIZER IN THE WORLD
Gallagher develops energizers that produce more current when more current is required because of a short-circuit for example.

1982

RANGE OF ENERGIZERS COMPLETE - MAINS, BATTERY AND SOLAR
To ensure the best possible solution for our customers, Gallagher markets a complete range of energizers with a comprehensive range of fencing accessories.

1998

1999

INTRODUCTION OF UNIQUE RING INSULATOR XDI
The first and only ring insulator that tells you when the insulator needs to be replaced.

2004

INTRODUCTION OF SMARTFENCE
Following ideas from European farmers, Gallagher refines the concept of portable fencing by launching this all-in-one solution.

2010

INTRODUCTION OF THE i SERIES
The i Series is designed to monitor the performance of the trusted, powerful Gallagher energizers quickly and easily.

2012

2014

INTRODUCTION OF RING POST
Based on farmers' ideas. The post prevents hooking into other posts.

INTRODUCTION OF THE INSULATED LINE POST
Innovative and cost-efficient solution for permanent electric fencing.

2016

2017

INTRODUCING THE MOST POWERFUL SOLAR ENERGIZER IN THE WORLD
The first integrated solar energizer for large fencing of up to 30 km in off-grid areas.

80 YEARS OF GALLAGHER
The undisputed best for 80 years. Onwards to the next 80!

NEW

NEW!
THE INSULATED LINE POST
FROM POST TO EFFICIENT FENCING SOLUTION!

The Insulated Line Post with clips is the new solution for permanent fencing. Ideal for leased pasture or difficult to reach pasture. This perfectly insulated post can be positioned and removed by hand without any difficulties. It is just as firmly in the ground as a permanent wooden post, because of the solid foot plate. Due to the fibreglass core and the HDPE coating, it is extremely flexible and gives a little when an animal or something else contacts the fencing. The post really is a complete solution with the corresponding clips that are suitable for all types of Gallagher conductors.

UNIQUE IN THE MARKET

max 1900 mm

WIRE
The insulated Line Post is suitable for all types of Gallagher conductors.

WIRE CLIP
For a simple connection of conductors of up to 8 mm. Rapid installation, easy to use.

LINE POST
Unique fencing post with durable design. Fully insulated, quick and easy to put up.

TAPE CLIP
Special clip for fencing tape. The tape is fixed easily and firmly between the rubber parts.

| 361307 | S400 incl. 2 batteries (12V - 4,0 J) | = 1 |

WHICH GALLAGHER ENERGIZER DO YOU NEED?

If you need to electrify fencing, Gallagher is the place for you! Will you opt for one of our intelligent energizers from the i Series? A battery solution? Maybe a solar energizer is better suited to your situation. Whatever your needs , we can offer the most reliable solution.

MULTI POWER

The Gallagher Multi Power energizers can be used in every possible way. Would you like to use solar panels, mains or a battery? No problem with these energizers!

MAINS ENERGIZERS

Our mains energizers are ideal for permanent fencing. These energizers do not need a battery and work on 230V.

There are different types of mains energizers for different types of fencing. Gallagher has the most suitable energizer for every type of fencing.

BATTERY ENERGIZERS

There may be fencing that cannot be connected to the mains and a battery energizer is a better choice in those situations. These energizers only need a battery and no mains. A number of energizers have a battery-saving option to lengthen the lifespan of the battery significantly.

SOLAR DEVICES

An energizer that works on solar power is the best choice for remote areas! The battery is charged by sunlight and converts it into electricity. The energizers will continue to run for 3 weeks without any sunlight, do not require maintenance, are environmentally friendly and reliable.

With the new Gallagher Solar range it is even possible to run fencing of up to 30 km on solar power! Absolutely unique in the market! Gallagher through and through!

MULTI POWER

Switches between 12V-230V / solar energy
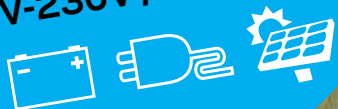

MULTI POWER

When it comes to flexibility, the Multi-Power energizers are the ideal choice for electric fencing. You can either just use the battery or to combine it with a solar panel to charge the battery. MultiPower energizers can also be connected to the mains by means of the optional mains adapter 12 V/230 V.

NEW POWERHOUSES MB2800i & MB1800i

ULTIMATE STRONG BATTERY ENERGIZER
—
UP TO 53 KM

MB2800i Multi Power

The most powerful and most intelligent battery energizer in the market - that is the MB2800i. This strong energizer provides enough power for fencing of up to 53 km. This energizer can be used with a battery and a solar panel or it can be connected to the mains. It is versatile, with absolute control over your fencing! The external displays makes it easy to read the performance of your energizer, and together with the optional accessories you can expand this control even further.

i SERIES ACCESSORIES

- Energizer controller: Shows all your fence performance information in one convenient separate display box that can be placed up to 50m away from the energizer itself.
- Remote controller: to turn the fence on/off anywhere along the fence line. Integrated fault finder functions lead you to the problem in the fence. 'Inquire' function shows energizer display on the Remote Controller from anywhere on the fence. Compatible with M1800i and M2800i only.
- SMS controller: warns you via a text message when the fence voltage gets below a preset alarm level. In addition, the controller sends updates to your mobile phone.
- Alarm controller: to connect a flashlight and / or siren as an alarm.
- Siren/flashlight: these alarm accessories can be connected (single or multiple) to your mains energizers. They will warn you in case there is a problem with your fence.

- Inverter 12V/230V permanent solar: enables you to power all energizers from a 12V source. Ideal for solar projects where i Series technology is required.
- Inverter 12V/230V battery backup: to connect a 12V battery to the i Series as a back-up. If the mains power is lost this device will switch to battery power and take over, so you will always have a safe electric fence.
- SMS remote controller: to switch all mains energizers on and off by calling or texting with your mobile phone. So if you detect a fence failure, you can instantly repair your fence without getting a shock.

B60 (12V - 0,7 J)

Entry level 12V battery powered energizer capable of powering up to 6km or 3 hectare of Multi-wire fence. Providing an effective electric shock on the fence from a small and easy to mount Energizer the B60 is designed for customers who require simplicity.

| 350301 | B60 | = 1 |

B50

Powerful device supplied by a 9 V disposable or 12 V storage battery. The LED shows red if battry voltage is low. 3 settings: full power, night mode and random. Battery savings options on 9 V battery (not 12V). Comes with connection for solar panel. Includes earth stake.

| 028931 | B50 | = 1 |

B40

The world's most energy efficient battery energizer! Only 9mA use in night safe mode. This means secure animal safety and ultra low battery consumption. Earth stake included.

| 386317 | B40 | = 1 |
| 068579 | B40 + 4W solar assist | = 1 |

B35

The B35 is a 9V Battery powered Energizer capable of powering up to 4 km or 1.5 hectare of Multi-wire fence. Providing a portable Energizer solution that is light and easy to move.

| 356433 | B35 | = 1 |
| 7608 | Stander B20/B35 | = 1 |

SPECIAL OFFER FREE BATTERY

B20

Feature-packed battery-operated device, powers fences up to 2km (without vegetation). Very easy to use. It operates on a 9V disposable battery or a 12V rechargeable battery. The device warns you when the battery is almost flat.

| 028818 | B20 | = 1 |
| 7608 | Stander B20/B35 | = 1 |

B11

Robust Battery-unit on self-supporting stand with carry handle for simple installation. Features 4 Battery Save Options that can be selected using the external switch. Built-in indicator light flashes with each pulse. 12V battery leads and 6x1,5V batteryset included.

| 013534 | B11 incl. 6x1.5V batteries | = 1 |

B10

Robust Battery-unit, has a built-in indicator light that flashes with each pulse. Ideal for strip grazing & protecting gardens from small animals. Operates by 6 x 1,5V Alkaline batteries D-cell LR20 (not included), also suitable for 12 Volt lead/acid battery, 12V adapter kit available (004747).

| 003634 | B10 | = 1 |

SOLAR

Are you looking for an energizer that provides free energy and is environmentally friendly too? Go for solar! The Gallagher solar range consists of energizers with an integrated solar panel. We also have individual solar panels and batteries that can be used with 9V/12V energizers.

S400

The S400 is the powerhouse of solar energizers. With the S400 you can power fencing of up to 30 km without any difficulties. The S400 has a powerful 40W solar panel. With the built-in smart battery management, the energizer works several weeks without daylight. It ensures you have current on your fencing all year round.

361307   S400 incl. 2 batteries (12V - 4,0 J) ❀ = 1

S200

The S200 is a portable solar energizer, suitable for fencing of up to 20 km. The S200 has a functional 20W solar panel. The energizer is easy to install and still puts enough current on the fencing after several weeks without daylight.

360300   S200 incl. 2 batteries (12V - 2,0 J) ❀ = 1

GALLAGHER

S100 incl. battery

12v 3

With the S100 it is easy to place fencing of up to 10 km without you having to charge the battery. This powerful energizer works on solar power, is quick to install and easy to transport. No more hassle with empty batteries, with the S100 you still have power, even after 3 weeks without sunshine!

S40 incl. battery

6v 3

The S40 is the ultimate energizer for fencing of up to 5 km. The energizer is quick to install and easy to transport. The energizer will work for 3 weeks without sunlight and has a built-in lightning conductor. This makes the S40 an excellent alternative to a battery-operated system.

| 346304 | S100 incl. battery | = 1 |
| 000442 | 12V 7.2Ah Battery S100, S200, S400 | = 1 |

S20 Incl.battery and solar mount

6v 3

Do you regularly move your animals to a different pasture? Your fencing is less than 2 km long? The S20 is your ideal choice. This energizers works on solar power and is environmentally friendly and maintenance free. It is also easy to move and fall-resistant.

S16 incl. battery

6v 3

The S16 is the ultimate portable Energizer solution, storing 0.1 J and capable of powering up to 1 mile/1,5km or 0.5 hectare of Multi-wire fence. The Energizer comes complete with a rechargeable battery and solar panel. The S16 is quick and easy to install and convenient to transport. This robust and highly portable unit makes a great alternative to battery-powered systems.

S10 incl. battery

The S10 is the latest solar energizer suitable for the hobby market and short fences <1 km>. The energizer is quick and easy to istall an will work for up to 3 weeks without sun and is capable to power trough the harshest winsters. The S10 is super tough making it drop resistant and waterproof. The Energizer comes complete with a rechargeable battery and solar panel.

Mount Solar post S10, S16, S20

Install the S10, S16 or S20 energizer on a Gallagher Ring Top Post using the Post Mount.

571102	Mount Solar post S10, S16, S20 = 1

S230

The ultimate solar combination: the trusted B200 with 1.45 Joules stored energy (for fences up to 13km), powered by an Optima Yellow top, that is charged by a 30W solar panel. For a reliable and maintenance free operation for many years.

060870	S230 (B200+30W+Optima 3,7l)	= 1

S220

The ultimate solar combination: the trusted B200 with 1.45 Joules stored energy (for fences up to 13km), powered by an 2,7L Optima Yellow top, that is charged by a 20W solar panel. For a reliable and maintenance free operation for many years.

061556	S220 (B200+20W+Optima 2,7l)	= 1

S280

Is your fencing longer than 13 km but shorter than 20 km? The S280 is the solution you're looking for. This special offer consists of a B280 Multi Power energizer, a carry box with brackets , a 30 Watt solar panel and an Optima 3.7L battery.

075843	S280	= 1

S180

Add the S180 and you have the complete package. This special offer consists of a B180 Multi Power energizer, a carry box with brackets , a 20 Watt solar panel and an Optima 2.7L battery. This gives you a complete solution for fencing of up to 13 km.

075836	S180	= 1

Solar assist kit

Solar assist kits 4W & 6W fits within a minute, 4W with the B40 & B50 energizers and the 6W with the B100, B200 & B300 energizers. It doesn't charge the battery but doubles battery life.

GALLAGHER

SOLAR PANELS

- Gallagher provides top-quality, tested solar panels with a 2-year warranty on all modules.
- Solar power is environmentally friendly and an increasingly popular economical energy provider.
- All solar panels have a controller that protects the battery against overcharging.
- The range is completed with galvanised brackets, bolts and clamps.
- All solar panels have polycrystalline cells for maximum energy yield.
- Solar panels can be used with mains energizers if you use a converter (item no 069392).

Calculate the solar panel you need with the solar-panel calculator at www.gallagher.eu/choose-solar-panel

SOLAR PANELS IN COMBINATION WITH BATTERY ENERGIZERS EXTEND THE LIFESPAN OF YOUR BATTERY

TIP!

Solar panel

12v **2**

Polycrystalline high-performance solar module with optimised low-light and temperature features. Shock-resistant and hardened solar glass with self-cleaning surface and sturdy aluminium frame. Complete with power cable. Very easy fitting. More than 20 year service life.

WHICH TYPE OF FENCING SUITS YOUR ANIMAL

The type of electric fencing that is best for you depends on your situation. Which animals do you keep? Are you looking for permanent or portable fencing? Would you like installation convenience or do you prefer minimal maintenance? All these questions determine your choice. Gallagher has a solution for every situation. We will be pleased to advise you!

FENCING SOLUTIONS

Permanent
Gallagher has permanent fencing available for every type of animal. For example, High Tensile is ideal for cattle or game and lasts up to 25 years. For horses, Gallagher recommends EquiFence. EquiFence is the most durable fencing for horses and is extremely safe because of the protective plastic cable.

Gallagher has the complete range of permanent fencing - from durable insultimber posts, top-quality conductors to robust insulators.

Semi-permanent
At times you may wish to put up fencing for a longer period of time without it being permanent, when you lease pasture for example. In those situations Gallagher provides the solution with semi-permanent fencing.

Portable fencing
If you move the animals several times a year, we recommend portable fencing. Gallagher has a solution for every situation. For example, the SmartFence 2.0 is the ideal solution for sheep and goats.

10-YEAR SYSTEM WARRANTY

If you use materials recommended by Gallagher: Ecoposts, Insultimber posts, Insulated Line Post, ElectroMax fencing wire, Equifence, reinforced S corner insulators, fixing wires, tension springs, rotating tensioners, Gallagher provides a 10-year system warranty.

Use the Fencing calculator to discover the type of fencing that is best suited to your situation.
www.gallagher.eu/compose-electric-fence

COMPLETE RANGE

After you have chosen the most suitable energizer, it is important to choose the correct parts. This Chapter contains an overview of all the other Gallagher products. Every single one of these products is guaranteed top quality!
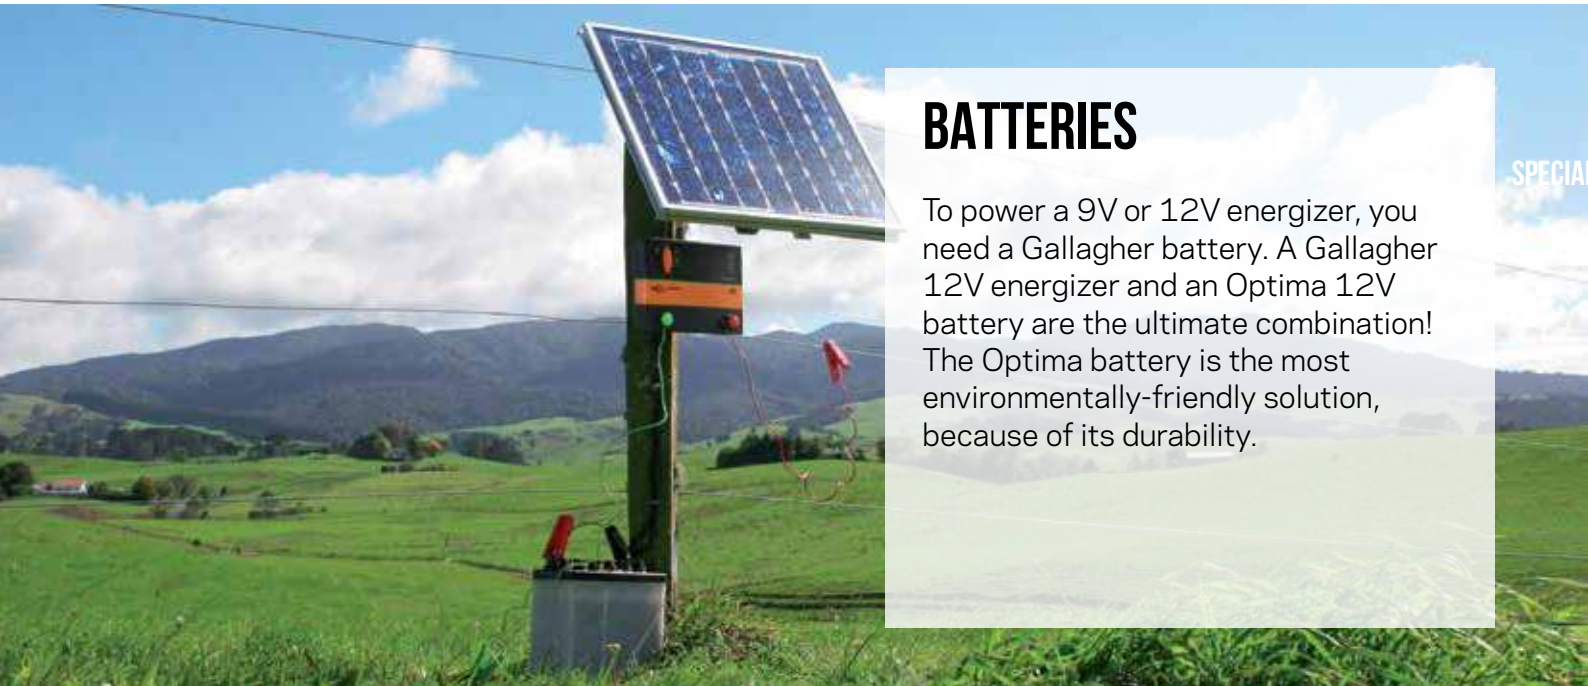

BATTERIES

To power a 9V or 12V energizer, you need a Gallagher battery. A Gallagher 12V energizer and an Optima 12V battery are the ultimate combination! The Optima battery is the most environmentally-friendly solution, because of its durability.

Duo pack battery 9 volt

9v

Environmentally friendly alkaline 9V battery for use with 9V battery powered energizers. Alkaline Batteries give you up to 30% better performance than Air Oxygen batteries. Suitable for all Gallagher 9V energizers.

007578	55Ah (160x110x115mm)	= 1
008704	120Ah (160x110x115mm)	= 1

THE BENEFITS OF OPTIMA 12V BATTERIES

THE OPTIMA BATTERY ENERGIZER IS THE MOST ECONOMICAL AND MOST ENVIRONMENTALLY-FRIENDLY SOLUTION, BECAUSE OF ITS DURABILITY.

- Ideal for seasonal use.
- Guaranteed the best purchase.
- Very good charge acceptance.
- Smaller than traditional battery energizers, easy to carry.
- Ideal for winter storage because of its very low self-discharge.
- Cost savings, as it lasts more than twice as long.
- It combines ideally with solar panels, because of its minimal internal resistance.

- Standard Battery
- Traction Battery
- GEL Battery
- Optima YELLOWTOP

CHARGE YOUR BATTERY REGULARLY DURING THE WINTER MONTHS!

TIP!

Optima Yellowtop S2,7L

12v

Uncompromising Quality! This Optima S2,7L 12V battery can be compared with a regular 65Ah 12V battery, but is smaller in size, lighter in weight and has a longer life. Ideal for use with solar modules. Extremely fast recharge with all common, regulated chargers.
Volume 2,7 litres, dimensions L237xH227xW129mm.

059621	Optima S2,7L	= 1
059614	Optima R3,7L	= 1
062096	Optima S5,5L	= 1

EARTHING

Earthing ensures that the current can flow back to the energizer as soon as an animal touches the fence. No earthing means no current on the fencing, which is essential to good fencing!

Bentonite super earthing mix

Earthing can be achieved simply and quickly with this mix, even in extremely dry conditions. The mixture of salt and absorbent clay retains moisture and increases the conductivity of the surrounding soil. To be used in poor earthing conditions and in combination with more powerful energizers. Excl. earth stake.

| 008773 | Bentonite | = 1 |

Lead out cable ø2,5mm XL

XL wire coated with a heavy duty double insulation. Good quality polyethylene for abrasion resistance in the ground. 2,5mm medium tensile aluminium coated wire 4 times the conductivity of 2,5mm galvanized wire. Ideal for carrying power long distances underground. For use between earth stakes.

| 016276 | ø2.5mm XL - 200m | = 1 |

Lead out cable

Double insulated lead-out cable to connect the energizer with the fence and to make underground connections (e.g. gateways). Use this cable for short distances. For distances over 30m use 2.5mm cable.

065028	ø1.6mm - 10m - 100 Ohm/1km	= 1
066097	ø1.6mm - 25m - 100 Ohm/1km	= 1

065011	ø2.5mm - 25m - 35 Ohm/1km	= 1
062712	ø2.5mm - 50m - 35 Ohm/1km	= 1
021611	ø2.5mm - 100m - 35 Ohm/1km	= 1
162713	ø2.5mm - 400m - 35 Ohm/1km	= 1

Earth stake

Without a proper Earth System your energizer will not perform . Always use galvanised earth stakes. Battery Energizers: Earth Stake length 1m c/w clamp.
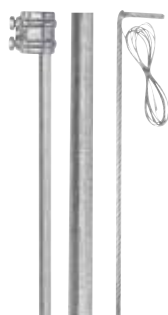

029037	2m with earth clamp	= 3
029020	1m with earth clamp	= 3
008735	Earth stake 1m (excl. earth clamp)	= 1
044030	Earth clamp	= 1

Earthing accessories

Earth clamp: guarantees a good connection between the earth stakes and lead-out cable from the energizer. Lead out joint kit: for a secure, waterproof connection of lead out cable without power loss.

044030	Earth clamp	= 1
063796	Lead-out connector	= 2
044023	Earth socket	= 1

SECURITY MEASURES AND TESTERS

Would you like to prevent your animals from escaping as result of a lack of current? Would you like to know what caused the short-circuit in your fencing? Do you want to protect your energizer against a lightning strike? You can with our range of protectors and testers!

Cut out switch

By using a switch, you can divide your fence into several sections and switch them on and off independently of each other. This will also help you trace any faults that occur.

060705	Cut out switch	= 1

Knife Cut-Off Switch

This switch helps you to switch off a part of the fencing for maintenance, for use for passages and gates or when you are looking for faults. The switch also offers the option to divide the fence into different plots. It can also be used to switch the fence on or off on the spot.
The switch is made of stainless steel, visible from a distance, and is supplied with fitting screws.

Lightning diverter

The only adjustable lightning diverter on the market, suitable for every energizer. Protects the energizer against damage through lightning by diverting the lightning from the fence to ground (earth). The lightning diverter needs to be mounted between the fence and the energizer. Can withstand multiple lightning strikes.

064802	Lightning diverter	= 1

000770	Knife Cut-Off Switch	= 1

Flood gate controller

Device especially for ditches that can be mounted on a fence. It stops the current flowing through the bottom line if the water (or another resistance) reaches the bottom wire. The rest of the wires will keep its voltage. Has a resistance of 5600 Ohm.

Security kit

The Security Kit protects your Maxi master from possible theft. The kit is very easy to install and can be used with all B100, B200, B300, S220 and S230 models.

1506	Flood gate controller	= 1

057002	Security Kit	= 1

Vandal proof box

A galvanised box that protects battery and fence units. To deter vandals, the box is connected to the energizer and can be locked with a padlock (not included). Fits max.350x160x240mm sized Energizers and max.360x260x230mm sized Battery. Dimensions incl.foot, 395x295x500mm. Suitable to place on Insultimber post 10x10cm, (not included, partnr. 017904). Ideal for B60/B80/B180/B280 and others.

019410	Vandal Proof Box	= 1

Battery energizer box

Portable box for electrical equipment and batteries. Maximum size of the battery 34 cm deep x 23 cm wide. Suitable for B60/B80/B180/B280. Other energizers will fit with little changes.

025237	Battery energizer box	= 1

Gallagher Solarbox

Portable box for energizer, battery and solar panel.
Suitable for:
Max. size of energizer: 380x110x300mm (lxwxh).
Max. size of battery: 330x175x240mm (lxwxh).
Gallagher solar panel 10W, 20W and 30Watt.

EU Warning sign (universal)

Warning signs must be attached to any electric fence every 50 metres wherever the fence borders a public right of way.

075881	EU Warning sign (universal)	= 1

Live fence indicator

The Live fence indicator is fitted to the fence and flashes with each pulse of the energizer so you can see whether the fencing is still working correctly.

511009	Live fence indicator	= 1

Neontester

A convenient tool for checking whether there is sufficient voltage at the electric fence. Not suitable for checking earth systems.
Range: Led 1, 1,0kV > 1,8kV, Led 2, 1,9kV > 2,5kV, Led 3, 2,6kV > 3,8kV, Led 4, 3,9kV > 4,8kV, Led 5, 4,9kV >

015019	Neontester	= 1

Fault Finder

Pinpoints faults quickly and easily whatever type of wire or energizer is used. By simultaneously measuring the current flow and voltage, the Fault Finder will follow the current flow to any one of a series of faults.

509051	Fault Finder	= 1
202068	Battery Fault Finder	= 1

Fence Volt Meter

Supplies exact information on the condition of your fence. Makes targeted trouble shooting very easy. Auto ON/OFF. Helpful tool for checking earthing system. Powered by one 9V battery (a life of 6-12 months). Displays fence voltage from 100V up to 12kV.

015033	Fence Voltmeter	= 1

GUARDING YOUR ANIMALS

The SMS Fence Alarm is a unique plug and play security system for your fence. In comparison with the existing systems, this product is a true breakthrough. It warns you with a text message if there is insufficient voltage (e.g. due to vegetation) or when the fencing is interrupted (e.g. when a gate is opened). You can divide your fence into 2 zones for accurate problem detection. It works for a whole season on 3 standard batteries (not included).

SMS fence alarm

A B C D E 2

The SMS fence alarm is a unique plug & play security for your fence. Compared with the existing devices this product is in another league. The SMS Fence alarm warns you via SMS if the voltage is too low.
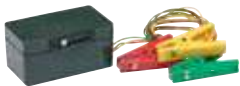

055654	SMS fence alarm	= 1

WHY SHOULD I INSTALL A SMS FENCE ALARM?

- Theft (*).
- Certainty that there is sufficient voltage at the end of the fencing.
- Works independently. Does not have to be connected to the energizer's battery (100% self-sufficiency).
- An immediate alert in the event of theft of the energizer.

(*) As it is vulnerable to theft, it is recommended to install the Fence Alarm separate from the energizer

POSTS

Gallagher has two types of posts - posts for temporary fencing and posts for permanent fencing. The permanent posts - Gallagher post, Ecopost and Insultimber post - differ from each other in terms of quality, sustainability and price. We also have portable posts in various types and sizes, including plastic posts, fibre-glass posts and metal posts. Each type has its own application.

Insultimber (FSC®)

Unique insulating posts where the use of insulators isn't necessary. Maintenance free. Long life time. 10 years guarantee.

No insulators required

Self insulated wooden posts for permanent fencing

Maintenance free

FSC® hallmark.

Long life - up to 30 years, with a 10 year guarantee

NEW!
THE INSULATED LINE POST

FROM POST TO EFFICIENT FENCING SOLUTION!

The Insulated Line Post with clips is the new solution for permanent fencing. Ideal for leased pasture or difficult to reach pasture. This perfectly insulated post can be positioned and removed by hand without any difficulties. It is just as firmly in the ground as a permanent wooden post, because of the solid foot plate. Due to the fibreglass core and the HDPE coating, it is extremely flexible and gives a little when an animal or something else contacts the fencing. The post really is a complete solution with the corresponding clips that are suitable for all types of Gallagher conductors.

Gallagher Insulated Line Post

Gallagher Insulated Line Post (1,35m), unique and durable design and extremely suitable for permanent fencing. Full self-insulating and extremely quick and easy to set up. The conductor can be attached to various pre-shaped positions with Line Post Clips that are available separately. The unique and durable benefits of this post are achieved by combining a fibreglass core with a UV-protected polyethylene exterior. Product warranty: 10 years. Lifespan: 25 years or more!

TurboLine Tape clip

Fast install, easy to use no tools required. Positive locking and quick release to enable re-tensioning of tape. Soft rubber pads lock tape in place to prevent tape movement and fraying.

747033	For Gallagher LinePost (40mm)	= 12

Wire clip for Line Post

You need this wire clip if you want to fit fencing wire or cord of up to 8mm (Gallagher EquiFence/permanent cable) to a Line Post. These clips have been developed especially for the Gallagher Line Post.

PATENT

742212   742014

744346	Wire clip for Line Post (8mm)	= 20

UNIQUE IN THE MARKET

- TESTIMONIAL -

Problem solved!

The new Gallagher Insulated Line Post is a true revolution in the fencing-post market. The post insulates perfectly, is just as sturdy in the ground as a wooden post, is just as easy to set up, has the flexibility and convenience of a fibreglass post during transport and is just as durable as a hardwood post.

Extremely cost-efficient solution!

With this post, a farmer creates extremely cost-efficient permanent fencing, because you can insert the post by hand and you don't need heavy machinery. Afterwards you can remove the post by hand and reuse it in other leased pasture. The post is also extremely compact and you do not need a special transport company to get it to your destination. You need relatively few posts for sturdy fencing - the distance between the posts on flat land is 7-12 metres.

Mark Harris
Product Manager Gallagher New Zealand

WIRE
The insulated Line Post is suitable for all types of Gallagher conductors.

WIRE CLIP
For a simple connection of conductors of up to 8 mm. Rapid installation, easy to use.

LINE POST
Unique fencing post with durable design. Fully insulated, quick and easy to put up.

TAPE CLIP
Special clip for fencing tape. The tape is fixed easily and firmly between the rubber parts.
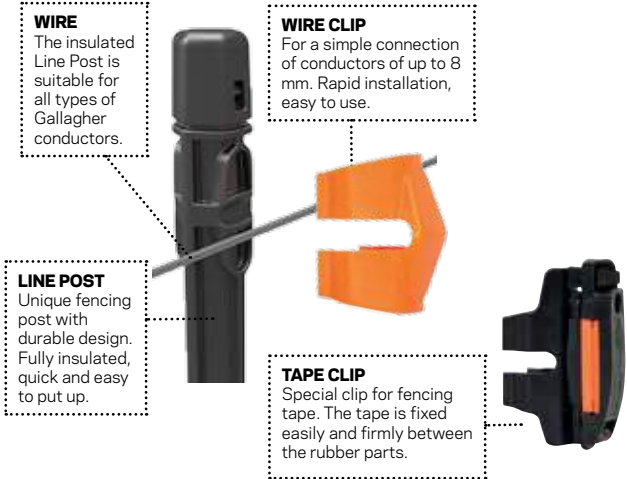

Rammer Line Post

Special rammer for convenient hammering in of a Gallagher Line post.

A PORTABLE POST FOR ANY SITUATION!

Light and easy to move

Gallagher also has portable posts in various types and sizes, including plastic posts, fibreglass posts and metal posts. They are all light-weight and easy to move. For example, we have plastic posts with wire holders so you do not need any loose insulators. The tread-in post has been developed specifically for portable horse fencing. You can take 50 of these smoothly finished posts in one hand when you fence off your pasture. You already know the spring steel post with pigtail insulator.
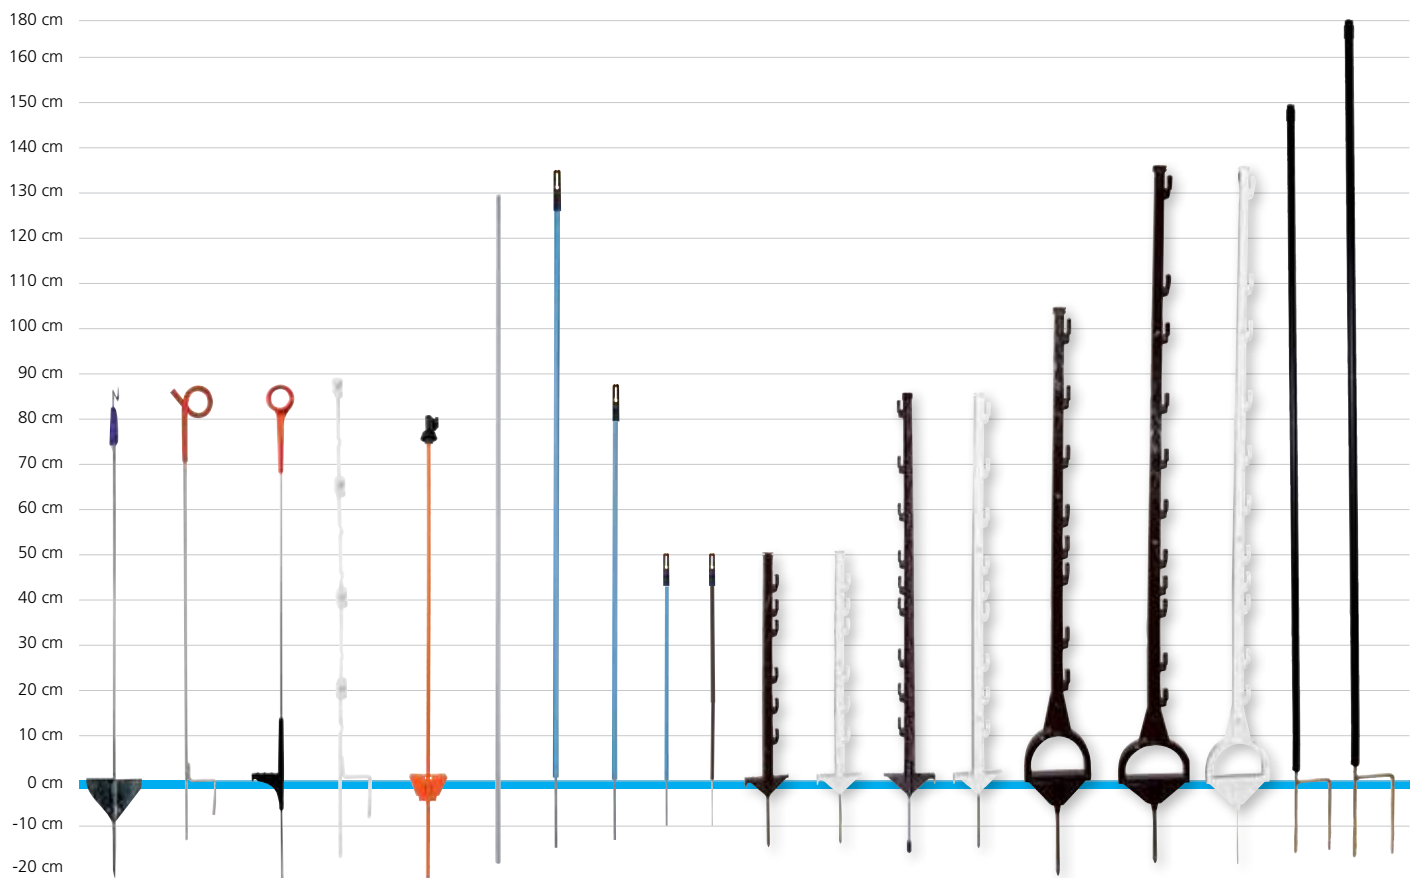

Ring Top post

The most popular option for dairy and beef cattle, practical design for stronger posts, no tangling and better grip in the ground.

PATENT

Super tough over-moulded GF nylon head eliminates shorting and prevents wearing through

Easy to use and install even in hard ground.

Unique head centred over shaft with no protrusions or trapping points to significantly reduce tangling

Long insulation sections strengthen shaft and provide insulation when handling to prevent shocks

Tough unbendable foot plate can withstand 200kg of pressure

| 723136 | Ring Top post - 1.00m | = 10 |

Pigtail post

Plastic coated spring steel post with UV stabilised plastic insulated orange pigtail insulator. If several wires are to be used, add screw-on insulator part no. 010950/010943. Maximum fence height: 0.85m.

067513	Insulator for 064253	= 10

Garden post / Pond Post

Compact, curved plastic post for mobile fences for deterring herons. Ideal for use near a pond. With curve as extra protection against animals leaning over and overhanging plants. For use in combination with plastic wire. Easy to fit. Maximum fence height: 51cm. Product warranty: 2 years.

065035	Garden post	= 5

CONDUCTING WIRES

The conducting wire in electric fencing is of crucial importance, because it transports the current. Even though all conducting wires would appear to be the same, there is a big difference in terms of price and quality. There are also differences in use. The Gallagher range consists of tape, cord, plastic wire, Equifence and High Tensile. Each of them with their different conductivity, durability and design. Make sure you choose the right conducting wire for your use!

EQUIFENCE

This is the most durable and safe Gallagher fencing for horses. EquiFence consists of an elastic plastic cable with a galvanised core. The 3mm thick plastic casing protects the horse against the zinc-aluminium core. The plastic casing has been made conductive by means of three carbon lines. Fitting a Gallagher EquiFence fencing requires experience, so please contact your Gallagher specialist.

Black carbon lines produce the conductive properties of EquiFence.

Core 2.5 mm aluminium-coated wire.

UV-resistant.
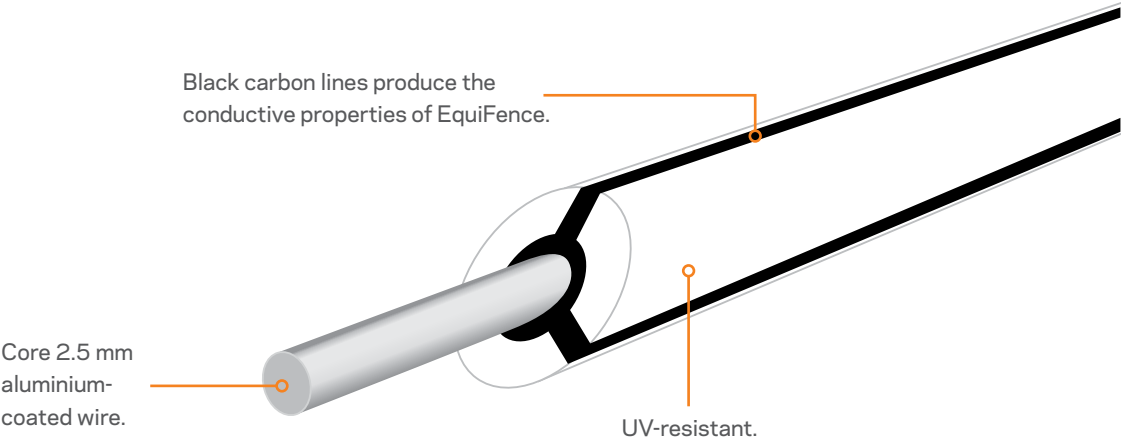

Equifence

The safest solution for your horse. Unique electrically conductive polymer (in black stripes) allows use as electric fence wire. Provides you, in combination with tension springs, ultimate safety for your horse. Total diameter of 7.5mm with a core of 2.5mm high tensile wire.

009124	White - 250m	= 1
053858	Terra - 250m	= 1

HIGH TENSILE

This aluminium-coated wire is many times better than any other steel wire. An aluminium coating on the 2.5mm thick core ensures superior conductivity of up to 15x more than a normal 2.5mm steel wire. The tensile strength of the wire is also particularly high at up to 500 kg. You can tension the wire very tightly and when used in combination with tension springs, you can work with a distance of 20m between posts. This produces considerable cost savings per metre.

ELECTROMAX 2.65MM

Particularly suitable for fencing that requires increased conductivity and control.

- 15% better conductivity than standard 2.5mm aluminium-coated wire
- Patented, advanced zinc-alu alloy coating produces superior corrosion resistance.

Special alloy
With 95% zinc and 5% aluminium.

Anti-rust
Due to the special alloy, its guaranteed life is 10 years.

Better conductivity
More current at the end of the fencing.

Protective packaging.

High conductive fence wire 2,65mm

15% more conductive than standard 2,5mm high tensile wire. Carries power further and handles shorts better. Patented zinc-alu alloy outer surface for up to 3 times longer life than standard high tensile wire.

069385	ø2,65mm, ca 600m	= 1

H.T. zinc-alu wire

Steel cored, high tensile fence wire with an aluminium coating for longer life and greater conductivity. Permanent Wire Tensioner and Tension Springs can be used to strain the wire.

NEW

039999	ø2,5mm - ca.625m (25kg)	= 1
077311	ø1,8mm - ca.1250m	= 1
004188	ø1,6mm - ca.1580m (25kg)	= 1
004195	ø1,6mm - ca.315m (5kg)	= 1

M.T. fencing wire

Erecting a permanent fence becomes very simple with this aluminised fencing wire. Easier to bend than regular HT wire, but strong enough to keep sheep, cattle or game in/out. Very low resistance, which makes this wire ideal for long fence lines.

060412	ø1.8mm - ca.500m (10kg)	= 1

Stranded wire

High conductive 7 strand galvanized wire for long portable fences which are affected by growth. To be used with rabbit, fox, pig, and sheep fences.

008759	ø2mm - 200m (3kg)	⬡ = 1
007806	ø2mm - 400m (6kg)	⬡ = 1

CORD, PLASTIC WIRE AND TAPE

ECONOMYLINE AND POWERLINE
For fencing that is shorter than 500 metres. Available in Tape, Cord and Vidoflex 3 and 6. PowerLine conductors are made of durable top-quality plastic and stainless steel

TURBOLINE
For fencing that is longer than 500 metres. Available in Tape, Cord and Vidoflex 9. With a Turboline conductor you are certain you have the absolute top in conductors.

Economy*Line* ⚡   **Power***Line* ⚡   **Turbo***Line* ⚡⚡

TAPE - PORTABLE AND PERMANENT FENCING
Tape has reinforced edges. You recognise PowerLine tape by the black side wire. These properties guarantee a longer lifespan for the product. The TurboLine version can be recognised by the red side wire and has a 40x better conductivity because of the light-metal wires that have been incorporated in the conductor.

Turbo*Star* ⚡⚡⚡   Extremely strong, super conductive tape for long, permanent equine fencing. Perfectly visible. The sturdy, conductive side wire in the edges provides extra strength. Power guaranteed from beginning to end due to excellent conductivity. The unique composition ensures 40x better conductivity than standard 40mm tape.

PLASTIC WIRE VIDOFLEX -
PORTABLE FENCING
Vidoflex is ultralight and extremely durable. The 3, 6 and 9 next to the name Vidoflex note the number of current wires that have been incorporated for conductivity. The conductive wires of Vidoflex 9 TurboLine are made of a special alloy that is particularly conductive.

CORD, SOFT VERSION -
PORTABLE AND PERMANENT FENCING
Cord is a conductive plastic wire suitable for fencing for cattle and horses. Available in a PowerLine or TurboLine version.

PowerLine rope Eco
🐎🐄 Ⓑ ③ ⑤ ☀

Blue Polywire - 400m

Blue polywire specially developed to keep wild animals out, in specific wild boars. Studies show that wild boars have poor eyesight and primarily see the color blue. Keep your crops safe by using this highly conductible wire.

| 075829 | Blue Polywire - 400m | = 1 |
| 072477 | Blue Polywire - 1000m | = 1 |

Vidoflex 9 TurboLine Plus

52% stronger than traditional polywire. Will not twist or kink when winding onto reels. Ideal for long portable fences, the patented mixed metal conductive wires carry the pulse 40 times better than standard PowerLine wire. Always use TurboLine products if fence > 500m.

GALLAGHER

PowerLine tape 40mm - 200m

Highly visible tape with black reinforced edges. 11 thick stainless steel wires and 1 mixed metal wire for excellent conductivity.

006246	White - 200m	= 1
060696	Terra - 200m	= 1

PowerLine tape 20mm

Clearly visible PowerLine Tape with black reinforced edges. Ideal for semi-portable horse fencing. 5 thick stainless steel wires and 1 mixed metal wire for good conductivity. Post spacing up to 5m.

106236	White - 200m	= 1

PowerLine tape 12,5mm

Strong, 12.5mm PowerLine Tape with 4 thick stainless steel wires and 1 mixed metal wire for good conductivity. Suitable for portable fences for cattle, young stock and horses. Post spacing up to 5m.

062303	White - 100m	= 1
026237	White - 200m	= 1

TurboLine tape 40mm

Very strong TurboLine Tape with reinforced red edges, intended for permanent fencing for horses. 40 times better conductivity than standard 40mm PowerLine Tape. With 11 stainless steel wires 0,16mm and 4 mixed metal wires 0,25mm. Post spacing up to 6m.

007592	White - 200m	= 1

TurboLine tape 20 mm

Very strong TurboLine Tape with reinforced red edges, suitable for semi-permanent horse fencing. Blends in with the surroundings so it is not so conspicuous. 40 times more conductive than standard Powerline tape. Post spacing up to 6m. Always use TurboLine products if fence > 500m.

007608	White - 200m	= 1
060702	Terra - 200m	= 1

TurboLine tape 12,5mm

12,5mm TurboLine Tape. The horizontal wires are interconnected at 13 cm intervals ensuring better conductivity. 40 times more conductive than standard polytape. Ideal for portable electric fences. Post spacing up to 5m. 200m and 400m rolls. Always use TurboLine tape if fence > 500m.

076232	White - 200m	= 1
086231	White - 400m	= 1

TurboStar tape 40mm white 100m

TurboStar Tape is a premium 40mm tape which has the lowest resistance available today. It has 40 times better conduction than regular tape and will result in more power on your fence due to 10 stainless steel wires and 4 mixed metal wires. Post spacing up to 6m. The sturdy and breathable features prevent tensioning regularly. Available in white and tera on 100m rolls.

INSULATORS

With our range of insulators we provide a solution for every type of fencing. Whether you use tape, cord, plastic wire, EquiFence or aluminium-coated wire, Gallagher has it all.
Our insulators stand out in terms of price, quality and durability.

XDI screw-in insulator

Improved screw-in insulator with unique advantages over traditional black screwing insulators. Much stronger due to the new technology.

PATENT
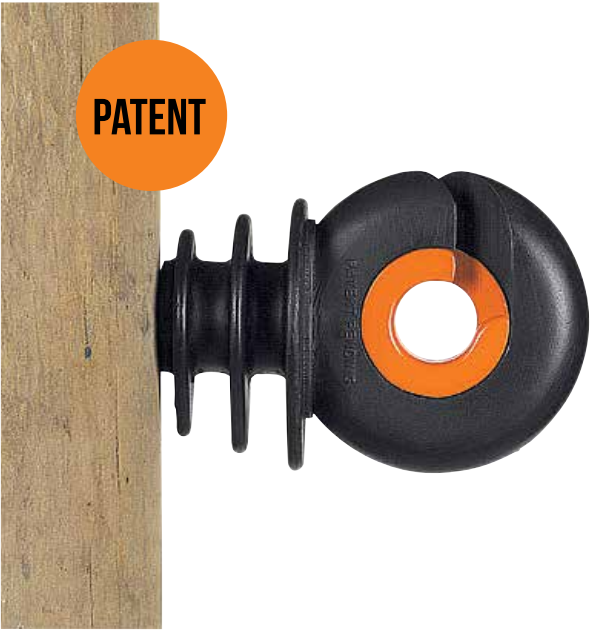

025510	XDI screw-in insulator	= 25
065059	XDI screw-in insulator	= 75
025527	XDI screw-in insulator	= 125
060788	XDI screw-in insulator	= 250

XDI bolt-on insulator

High quality Bolt-on insulator with metal core. The orange ring guarantees an equal distance between the insulator and the conductor. Suitable for (poly) wire or cord on a steel post, like the Termination post (022014/022236). (External thread length 25mm M6 incl. 2xnut, total lenght 33mm).

Screw-in Insulator PROMOPACK (100)

With metal core. High-quality black plastic. For wooden posts. Suitable for (poly) wire and cord.

PROMO PACK — EVEN MORE ECONOMICAL

| 057795 | XDI bolt-on - M6x23mm | = 10 |

| 071074 | Screw-in Insulator | = 100 |

Screw-in insulator

Low-priced, high quality screw-in insulator without metal core. Suitable for wooden posts.

060894	Screw-in insulator Economy	= 75

Wire clip for Line Post

You need this wire clip if you want to fit fencing wire or cord of up to 8mm (Gallagher EquiFence/permanent cable) to a Line Post. These clips have been developed especially for the Gallagher Line Post.

NEW

744346	Wire clip for Line Post (8mm) (20)	= 20

Claw Insulator

Insulator for permanent fencing with flat back for stable fitting on a concrete post. Suitable for HT wire and Vidoflex.

NEW

| 709048	For concrete post (25)	= 25

Screw-in insulator

Solid High quality screw-in insulator without metal core, therefore no short circuiting possible. For adding a wire to a wooden fence post.

004089	Small	= 25
040711	Small	= 125
011193	Small	= 250
009008	Super	= 25
040728	Super	= 100
011209	Super	= 250

Wooden post "W" insulator

Made from high density, sunlight resistant polyethylene plastic. Large heavy duty shield eliminates power leakage. Suitable for guiding wire around a corner post.

006734	Black	= 25
028498	Black	= 175

Wooden post "W" super insulator

Made from high density, sunlight resistant polyethylene plastic. Large heavy duty shield eliminates power leakage. Suitable for guiding wire around a corner post.

067612	White	= 25
067617	White	= 175
067605	Black	= 25
021055	Black	= 175

Strain insulator

Suitable for short strains and semi-permanent short fences. Available in plastic and super strong polycarbonate

011025	Black	= 5
012015	Black	= 100

Strain insulator reinforced

Suitable for short strains and semi-permanent short fences. Available in plastic and super strong polycarbonate.

011032	White	= 5
678023	Black	= 5
012022	White	= 100
678061	Black	= 100

Porcelain insulator

A porcelain End-strain Insulator for high tensions.

015139	White	= 6
053506	White	= 60

Porcelain insulator

A porcelain roll-corner insulator to strain the wires on the corner posts.

015146	White	= 6
015141	White	= 60

Roller screw-in insulator

Innovative Gallagher design. Easy to install. Suitable for poly wire and rope. The special design means the wire always returns to the roll.
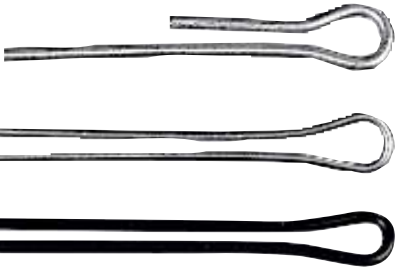

029013	Roller screw-in insulator	= 5

Clip

We recommend the use of Part.No 011056 for fixing wire to an Insultimber post or Gallagher Ecopost. Use Part.No 011063 with 1 metre droppers. You can tighten the clips using the wire twister (part.no 005232).

997025	Plastic coated	= 50
011056	Short	= 25
024698	Short	= 1000
011063	Long	= 50
024704	Long	= 1000

Roller insulator

For use with Termination post (022014/022236) or for fixing to a wooden fence post. Only suitable for poly wire.

010707	Roller insulator	= 5

Roller bolt-on insulator

For use with Termination post (022014/022236). Only suitable for poly wire. External thread length 28mm. M8 incl. 2 x nut.

010714	Bolt-on - M8	= 5

PowerLine tape insulator

Insulator used to fix 40mm tape to wooden fence post. Can be stapled, nailed or screwed to post. The tape is very easy to fix.
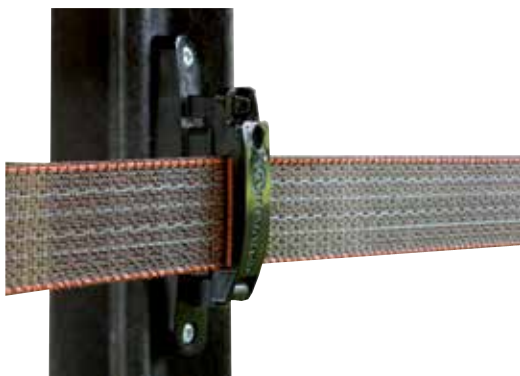

011094	PowerLine tape insulator	= 25
040674	PowerLine tape insulator	= 125

TurboLine horse insulator

Insulator with soft faces to lock the tape between two rubber sleeves (patented system). Fixes the tape with 1 click and prevents wearing guaranteeing a long life for your tape. Additional screw can be used to tighten the insulator even more.

699004	TurboLine horse insulator	= 20
699066	TurboLine horse insulator	= 100

TurboLine horse corner/strain insulator

The new very innovative robust Corner Insulator. Has a lot of advantages compared to the traditional insulators. A unique sub frame for optimal strength and fixation at the post. Pre mounted rubber grip for best tape fixation. Can be installed with only one drill bit. A unique slot to strain and re-strain your tape. The optional metal plate (art. 708027) can be used as a tape connector and gate anchor.

701028	TurboLine corner/strain insulator	= 5
701042	TurboLine corner/strain insulator	= 30
708027	Plate for 701028/701042	= 5

TurboLine tape insulator

Insulator with soft faces to lock the tape between two rubber sleeves (patented system) to prevent the wear off guaranteeing a long life for your tape.

011087	TurboLine tape insulator	= 20
021482	TurboLine tape insulator	= 100

TurboLine corner/strain insulator

Corner insulator in high quality plastic which secures the tape between 2 rubber sleeves (patented system), guaranteeing long life for your tape. Use the connecting plate (Part No. 010745) for end (gate) posts to ensure good connection between the tapes.

016702	TurboLine corner/strain insulator	= 5
043880	TurboLine corner/strain insulator	= 30
010745	Tape joiner 20/40mm	= 5

TurboLine Tape clip

Fast install, easy to use no tools required. Positive locking and quick release to enable re-tensioning of tape. Soft rubber pads lock tape in place to prevent tape movement and fraying.

NEW

747033	For Gallagher LinePost (40mm) (12)	= 12

XDI offset bolt-on insulator 20cm / M6

Innovative Gallagher design. Much stronger than the standard offset insulator due to a new technique, and more durable due to its metal core. The chance of short-circuits is zero. The orange plastic section serves as a wear indicator. (Total lenght 200mm, external thread length 125mm M6 incl. 2xnut/washer).

029006	XDI offset Bolt-on (M6) - 20cm	= 10

XDI offset screw-in insulator 10cm

Innovative design. Much stronger than the standard offset screw- in insulator thanks to a new technique. More durable thanks to its metal core. The chance of short-circuits is zero. The orange plastic section serves as a wear indicator. To be used with wooden posts. Distance 18cm.

NEW

075904	XDI offset screw-in insulator - 10cm	= 20
077274	XDI offset screw-in insulator - 10cm	= 100

GALLAGHER

XDI offset screw-in insulator 18cm

Innovative design. Much stronger than the standard offset screw- in insulator thanks to a new technique. More durable thanks to its metal core. The chance of short-circuits is zero. The orange plastic section serves as a wear indicator. To be used with wooden posts. Distance 18cm.

| 028993 | XDI offset screw-in insulator - 18cm | = 10 |
| 042647 | XDI - 18cm | = 100 |

XDI offset insulator 18cm

High quality offset insulator (18cm) with metal core, helps prevent damage to non-electric fences. The orange ring guarantees an equal distance between the insulator and the conductor. Suitable for (poly) wire or cord.

| 057801 | XDI offset insulator - 18cm | = 10 |
| 057818 | XDI offset insulator - 18cm | = 100 |

Offset insulator 10cm (20)

Solid high quality offset screw-in insulator (10cm) for wooden posts. Without metal core. Suitable for (poly) wire and cord.

| 072491 | Offset insulator 10cm | = 20 |

Wire Insulator

This insulator has been developed especially for fitting on a spacer insulator (item 072491 or 029006). With this combination you can quickly and easily create a plus-minus fencing on your fence to keep cats out or in your garden.

NEW

| 077335 | For pos/neg Fence System | = 30 |

Offset screw-in insulator 20cm

For electrifying non-electric fences quickly and effectively. Distance 20cm. With insulator suitable for wire and rope up to 9mm.
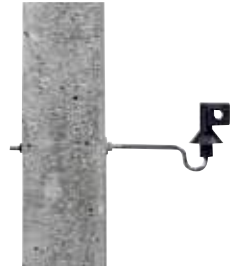

| 009350 | Wood - 20cm | = 10 |

Offset bolt-on insulator 20cm / M6

For electrifying non-electric fences quickly and effectively. Distance 20cm. With insulator suitable for wire and rope up to 9mm. To be used with steel posts. (External thread length 110mm M6 incl. 2xnut).

| 007516 | Bolt-on (M6) - 20cm | = 10 |

Pigtail offset

For electrifying specific existing non-live fences quickly. Available in 2 lengths: 17.5cm or 40cm. Very suitable for rope and tape. Pre-drill hole and staple the offset to the wooden post.

010981	White - 17.5cm	= 10
720234	Terra - 17.5cm	= 10
010998	White - 40cm	= 10
720135	Terra - 40cm	= 10

Steel post Live Tip Lockset Offset (16cm, pack of 20)

With an electrified tip and zero leakage through the post, the live tip offsets are an effective, new option for protecting existing fences. 10 year product warranty.
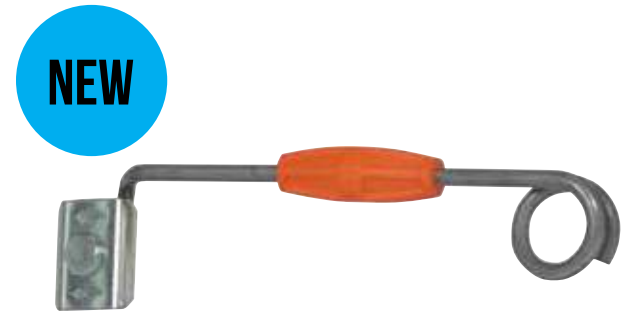

Wood post Live tip Offset 16cm

With an electrified tip and zero leakage through the post, the live tip offsets are an effective, new option for protecting existing fences. 10 year product warranty.

| 006183 | 16cm | = 20 |
| 006190 | 26cm | = 20 |

NEW

| 006145 | 16cm (20) | = 20 |

Offset insulator

For protecting and electrifying chain link netting. The completely galvanized clips are easy to fit to any type of netting. Pin lock insulator makes fixing the wire easy. 32cm long.

010912	Chain link - 32cm	= 25

Offset Pinlock Insulator 30cm Black

For electrifying existing or run down fences. Easy to fix. 30cm long. Large spark guard. Pin lock for easy installation and removal of wires.

659046	Offset Pinlock Insulator	= 25

Mounting bracket

Mounting bracket. Fits on every garden wire enclosure. Incl. a connection point (M6 and M8) for insulator 010714/057795/007516 to also protect your garden wire enclosure. Fitted with a rubber insert to prevent damage to the post.

008780	Mounting bracket ø40-60mm	= 5

Clip

Easy to use stainless steel clips for adding an extra wire to the Gallagher Fibre glass post ø10mm.

018300	Clip fibreglass post ø10mm	= 25

Screw-on rod insulator (20)

For adding extra wire to round portable posts. Ideal for steel pigtail posts.

010950	Screw-on rod Black ø4-10mm	= 20
010936	Screw-on rod Green ø6-14mm	= 20
011230	Screw-on rod Green ø6-14mm	= 250
010943	Screw-on rod White ø6-16mm	= 10

Insulator for metal orange post

Adjustable insulator for Spring steel Post (art. 008902/019274).

010752	Insulator for 008902/019274	= 10

Clips stainless steel

Easy to use stainless steel clips for adding an extra wire to the Gallagher pvc post 13mm.

003266	Clips for PVC post 13mm	= 10
063499	Clips for PVC post 19mm	= 25

CONNECTORS

Connectors are crucial in electric fencing. They are relatively small parts, but essential to proper current conductivity. Knotting wire together produces a loss of power, rendering the fencing ineffective. Fitting a good connector represents a minor investment, but you do have perfect fencing!

Vidoflex connector (4)

This stainless steel clamp provides a good conductive connection between polywire. Easy to use.

060764	Vidoflex connector	= 4

Cord connector with wingnut

This stainless steel clamp provides a good conductive connection between Rope or Vidoflex.

075928	Cord connector with wingnut	= 4

Connectors

This stainless steel clamp provides a good conductive connection between Rope or Vidoflex.

019342	Rope connector	= 4
071159	Rope connector	= 25

Joint clamp

Essential for ensuring there is no loss of conductivity at connections. Effective animal control is dependant on optimum conductivity around the power fence. Heavily galvanized for durability and long life. Suitable for all size wire and rope.
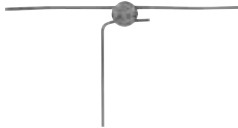

010851	Bobbin	= 10
603568	Bobbin	= 100

Joint clamp angle

Essential for ensuring there is no loss of conductivity at connections. Effective animal control is dependant on optimum conductivity around the power fence. Heavily galvanized for durability and long life. Suitable for all size wire and rope.

010868	Wing nut	= 10
603964	Wing nut	= 100
060498	Hex nut	= 100

Tape joiner

Innovative Gallagher design. For connecting and tensioning tape up to 20mm. Easy to install using the rucksack clasp principle. Now it is easy to connect tension and release tape.
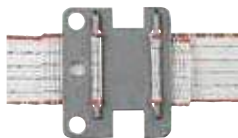

028979	Tape joiner 12,5/20mm	= 5
028962	Tape joiner 20/40mm	= 5

Tape joiner

🐴 Ⓐ ② R.V.S.

To be used in combination with part no. 016702 or for joining and/or connect 20/40mm tape. Gives excellent mechanical and electrical connection. Made from non-rusting stainless steel.
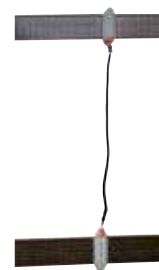

| 010745 | Tape joiner 20/40mm | 🐝 = 5 |

Tape connectors

🐴 Ⓐ ②

Double connector for connecting two rows of tape. Length cable: 60cm.

| 055333 | Tape connectors - 60cm | 🐝 = 1 |

Tape energizer connector

🐴 Ⓐ ② R.V.S.

Single connector for perfect connection from the energizer to the tape fence line. Length cable: 130cm.

| 055340 | Tape energizer connector - 130cm | 🐝 = 1 |

End strain kit

🐄 🐑 🐴 Ⓒ ②

Kit to easily tension Equiwire or High Tensile using a socket, fork spanner or a tensioner (695303). Eliminates the need for wire knots. May be used on all Gallagher wooden posts. Includes 2 tensioners.

| 618005 | End strain kit | 🐝 = 2 |
| 695303 | Handle for tensioner 618005/056095 | 🐝 = 1 |

Clip lock strainer

🐴 🐖 🐄 🐴 Ⓒ ⑩

Clip lock strainers can be placed in the fence line during or after building your fence. For easy straining and re-straining your wires.

| 056095 | Clip lock strainer | 🐝 = 2 |
| 695303 | Handle for tensioner 618005/056095 | 🐝 = 1 |

Rope tensioner

🐴 🐖 Ⓑ ② UV

For easy tensioning of rope. Easy release thumb catch. For use in combination with the roller screw-in insulator. (# 029013) or the strain insulator (# 011025/011032). Comes as standard with a roller screw-in insulator.

| 028955 | Rope tensioner | 🐝 = 1 |

Tension spring

🐴 🐖 🐴 Ⓒ ⑩ R.V.S.

The tension spring neutralises the tension difference in the wire which is caused by fluctuations in temperature. It keeps the wire evenly tensioned during summer and winter, which means you can double (up to 15m) the distance between the posts. Suitable for 1.6mm and 1.8mm HT wire. Maximum tension strength 85kg. Stainless steel, lenght spring 155mm, Productwarranty 10 Year.

| 004133 | For H.T. ø1,6mm/1,8mm | 🐝 = 1 |

Tension spring

🐴 🐖 🐴 🐴 Ⓒ ⑩ R.V.S.

The tension spring neutralises the tension difference in the wire which is caused by fluctuations in temperature. It keeps the wire evenly tensioned during summer and winter, which means you can double (up to 15m) the distance between the posts. Suitable for 2.5mm and 2.65mm HT wire and EquiFence. Maximum tension strength 200kg. Stainless steel, lenght spring 345mm, Productwarranty 10 Year.

| 036257 | For HT/EQ ø2,5mm/2,65mm | 🐝 = 1 |

Wire tensioner

🐴 🐖 🐄 🐴 Ⓑ Ⓒ ⑩

Use of this unique tensioner means that the wire does not have to be cut to strain it. Consequently, the power in the wire will be uninterrupted. Strong, lightweight, rust resistant construction. Can be used to join wires. Also suitable for rope. Excl. Wiretensioner (029044 or 006451).

| 010882 | Wire tensioner | 🐝 = 3 |
| 021475 | Wire tensioner | 🐝 = 25 |

GATES

Gallagher has several options for making a gate. Are you familiar with the Gallagher multi-wire gate set? They are ideal! It allows you to open and close the gate with one hand.

We also have a tough electric gate for permanent fencing.

Multi strand gate kit

The most complete and easy to use all-in-one multi strain electric gate on the market. Provides a low cost gate solution for practically any width gateway. Comes with 40mm tape.

NETTING

Gallagher has wide range of netting for ideal and reliable portable/moveable fencing. Whether you need netting for sheep, chickens, rabbits, cats, dogs or goats, we've got it.

We would also like to introduce you to our ideal fencing for sheep and cattle. The SmartFence 2.0 is our pride and joy - the perfect alternative to standard fencing netting.

NETTING KEY

We have a wide range of netting. Please use the key to find the right netting for you. It enables you to find the specifications of the netting.

For example:

Sheep netting, Orange 90/1 W 14/G - 50m

1. the type of netting
2. the colour of the netting
3. the height of the netting (cm)
4. 1= single pin
   2 = double pin
5. with a reinforced bottom wire
6. the number of posts
7. the colour of the posts: G=green / W=white / B=black
8. length of netting

Sheep netting

Complete and user-friendly portable fencing netting for sheep and lambs. Also suitable as fencing near ditches so new-born lambs can stay in the pasture in complete safety. Length: 50m. Includes 14 posts with a single pin that are incorporated into the netting. Several nets are easy to connect together.

075379	Orange, 90/1 - 14/W - 50m	= 1
022175	Orange, 90/2 - 14/G - 50m	= 1

Heron kit

A basic system for a fence around your pond. Through this safe, highly effective fence system your pond is a prohibited area for herons, prevents them from eating fish from your pond. The system includes an energizer with wall clip, 10 border posts, 20 clips, 100 meters of black plastic wire and connecting wire. The material is suitable for a 2-wire fence with a total length of 50 meters.

ELECTRIC FENCING ON A WOODEN FENCE — HOW DOES THAT WORK?

An animal is given shock when it connects the + and – wires. The bottom wire (-) operates as the earthing. When a cat touches the fence with its paws, it will make contact with the earth wire (-). It then closes the circuit by touching the + wire with its head. This produces a shock effect, which makes the cat jump back into the garden.

4.000V IMPULSE TENSION

ELECTRIC FENCING FOR DOMESTIC ANIMALS IS HARMLESS!

An electric fence is based on the principle of a very short pulse being transferred over a wire. This pulse creates a current flow that is conducted over the skin instead of over the body. This ensures that only a shock reaction is created and no harm is done to the animal.

H-Trap (195x120cm)

Control horseflies without chemicals. Neither animals, such as horses or cattle, nor people enjoy horseflies. The H-trap reduces the horsefly population to an absolute minimum. Tests have demonstrated that a 90–95% reduction in horseflies can be achieved around an H-trap without using pesticides or electricity.

034014	Horse fly trap	= 1

MT-Trap (40x50cm)

You need a horsefly trap to stop horseflies and wasps and this horsefly trap ensures that 95% of horseflies is captured. The MultiTrap, a portable horsefly trap, also known as the MT-trap, has been designed to eradicate horseflies and wasps.

HOW DO I INSTALL MY FENCING?

For properly operating permanent fencing you are looking for durable materials that you can use for many years. It is equally important to make sure this permanent fencing is erected properly. We are pleased to explain the basic principles of how to build permanent fencing. For more comprehensive information, please visit www.gallagher.eu

1. Prepare a plan
2. Determine the correct wire height
3. Put up the corner posts
4. Put up the intermediate posts
5. Tension the fencing
6. Fit the energizer and earthing

PREPARE FOR THE GRAZING SEASON,
DO THE GALLAGHER CHECK!

1. Check your electric fence energizer
2. Check the voltage on your fence
3. Check your fencing
4. Check your earthing

It goes without saying that all these steps are explained in detail in the Gallagher Check video. This is available at www.gallagher.eu or our YouTube channel.

WEIGHING AND EID SYSTEMS

With more than 75 years of experience in the agricultural sector and a reputation in ground-breaking innovations, Gallagher is (at the forefront of new developments) when it comes to weighing and EID solutions - with a complete line of equipment for weighing animals, data collection and EID systems.

TW-3 and TW-1, the new Gallagher Touch Weigh Scale range makes weighing and data management easier than ever before. Manage your animal weights and weight gain all on an easy to use, fully intuitive touch screen.

Weight gain at the touch of a finger.

TW-3

Simple to operate weigh scale and data collector

Record and analyse animal data to optimise performance

NEW

TW-1

Simple to operate, touch screen weigh scale

Collect data to optimise animal performance

NEW

026039	TW-3 Weigh Scale and Data Collector	= 1

Gallagher scales provide a modern, performance-aware cattle farmer with an innovative weighing system that are durable, reliable, accurate and extremely easy to use.

Digital weighing system, with serial port and Bluetooth compatible.

Weigh scale W310

Large and easy to read display.

Simple operation with large push buttons.

Internal, chargeable battery with an extremely long lifespan.

Quick, automatic, accurate weight records.

Quick weigh kit 600

Weigh scale W210

Can be used in combination with an aluminium platform.

Loadbars: 2000 kg 600 mm

013053	Weigh scale W310	= 1
054053	Quickweigh kit 600/W210	= 1

Weigh scale W110

Sturdy design, suitable for outdoor use.

3 weighing options.

Plug and play system for easy use.

Compatible with loadbars up to 2000 kg, 1000 mm and load cell.

Battery operated (4x AA batteries).

Gallagher's new entry model for weighing systems.

Digital weighing system, entry level model. For use with loadbars of 1,500 kg (580 mm), 2,000 kg (1,000 mm) and load cell. The scales can be used in three ways:

1. Static weights or products.
2. Manually weighing animals, taking account of any movements by the animal.
3. Automatically weighing animals (the weight is determined as soon as it is stable).

An EID tag reader is an essential component of your EID system. The scanner reads the unique tag number of the individual animals and stores it during weighing, treatment or identification in the field or the shed.

Gallagher portable EID hand scanners are lightweight, durable and easy to use - perfect to take to different sites. Animal details can be scanned, recorded and collected in any part of the farm.

SmartReader HR5

Large, easy to read screen and complete keyboard.

LED, vibrations and sound to note a tag is being scanned.

ISO half and full duplex.

Market leader, ergonomic design with great range and hand guard for maximum safety of the operator.

Quick and continuous reading with one click on the switch.
